

October 2023 Report

Faculty Success

Meeting October 11, 2023

A request for the committee to provide a formal proposition for Faculty Senator On-Boarding procedures was provided to the committee for consideration. With discussion, the committee concluded that time was needed to review the document and provide a formal proposition to the full senate. One member volunteered to review and edit the document for the committee to discuss in the November 2023 meeting and put forth during the December 2023 meeting.

There was extensive discussion that the Faculty Success is not a recognized committee. In the constitution, University Planning is one of the standing committees of the Faculty Senate (Article VII Section 1. and Article VII Section 2.2.). It was further suggested that to formally change to standing committee to the constitution would require posting on the Faculty Senate website require approval by members of the faculty who are qualified to vote.

Respectfully submitted:

Glenn Duff

Animal and Range Sciences

Chair, Faculty Success
