

September 2023 Report

Faculty Success

Meeting September 13, 2023

There were no formal propositions for the committee to review and vote on, however, the committee started evaluating the proposed new draft of a P and T timeline that the Provost's office is working on. Sr. Associate Provost Dr. James McAteer attended the meeting and answered questions from the committee:

Items brought up included:

- Watermark problems that may be encountered and the potential impact on the timing.
- Need for more than 3 weeks at the college level to evaluate packets.
- Question on College Tract faculty timelines the same.
- Annual versus academic year timeline.

Subsequent discussion on the timeline that the Faculty Success Committee provide input on the guidelines, if needed and put a proposition before the Faculty Senate.

Other discussion centered around first faculty senate meeting.

Respectfully submitted:

Glenn Duff

Animal and Range Sciences

Chair, Faculty Success
